

GVPT Data Science Camp

Class Presentations

Ryan Bookstein

August 27, 2026

University of Maryland

- ▶ Explore an interesting question using the skills you have learned so far

Learning Objectives

- ▶ Explore an interesting question using the skills you have learned so far
- ▶ Create a clean, annotated coding script you can use in the future

- ▶ You will present on a topic relevant to your research interests

- ▶ You will present on a topic relevant to your research interests
- ▶ You will create a set of slides to support this presentation

- ▶ In this presentation, you must include the following:

- ▶ In this presentation, you must include the following:
- ▶ A plot of a categorical variable (`geom_bar()`)

- ▶ In this presentation, you must include the following:
- ▶ A plot of a categorical variable (`geom_bar()`)
- ▶ A plot of a continuous variable (`geom_histogram()` or `geom_density()`)

- ▶ In this presentation, you must include the following:
- ▶ A plot of a categorical variable (`geom_bar()`)
- ▶ A plot of a continuous variable (`geom_histogram()` or `geom_density()`)
- ▶ A plot showing the relationship between two continuous variables (`geom_point()`)

- ▶ In this presentation, you must include the following:
- ▶ A plot of a categorical variable (`geom_bar()`)
- ▶ A plot of a continuous variable (`geom_histogram()` or `geom_density()`)
- ▶ A plot showing the relationship between two continuous variables (`geom_point()`)
- ▶ A plot showing the relationship between a categorical and a continuous variable (`geom_boxplot()`)

How the Session Will Run

- ▶ Five minutes to present, with questions and discussion after each talk

How the Session Will Run

- ▶ Five minutes to present, with questions and discussion after each talk
- ▶ We will go in alphabetical order

How the Session Will Run

- ▶ Five minutes to present, with questions and discussion after each talk
- ▶ We will go in alphabetical order
- ▶ Build your slides in Overleaf, Quarto, or PowerPoint — whichever you prefer

Questions?
